City Range

Finger Guards

Finger guards minimise the likelihood of children and others from trapping their fingers between the door and door frame. This is particularly important in public buildings such as schools, sports facilities or swimming pools where automatic door operators or door closers are in use.

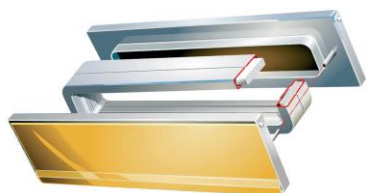

The Fingershield pattern shown above can be supplied to singly to fit either the hinge side or opening side of the door and also as a pair.

Due to the wide range of finger guards available please ring for further information.

City Range

This range of nylon levers and pull handles is manufactured to exacting standards from polyamide nylon giving good tensile properties, impact strength and wear resistance.

Nylon gives good antistatic behaviour and resistance to corrosion and chemicals.

The levers are available in both solid and steel core versions. The steel core version is suitable for fire doors.

Art Deco

The quality and strength of Art Deco comes from the simplicity of its design. Coming from a time of rapid developments in design and manufacture it reflects the glories of an age of luxury.

The furniture shown here was originally designed and manufactured in that period and is faithfully reproduced today by the original manufacturer.

This furniture looks good in both the buildings of the time and in today's buildings. The quality of manufacture ensures that the product will last a lifetime.* It is available in Polished brass (shown) and Satin or Polished Chrome finishes.

For full details please contact us.

* As with all manufactured items regular maintenance is needed to preserve the good looks and operation of this furniture

City Range

Regal Scroll

Available with a range of different sizes and shapes of back plates this classic lever brings grace and elegance to both panel and veneered doors.

A range of matching door and window fittings is available to compliment these ranges of high quality levers and pull handles. Please contact us for further details.
